# YOUR QUESTIONS

- *Revising IMTS 2010?*
- *Exclusion of content delivered electronically from IMTS?*
- *Feedback mechanism from users of statistics?*

# QUESTIONS FROM E-LEARNING COURSE

- *I would like to know how different countries classify the software (that is to include in IMTS or not)?*
- *Cut and polished diamonds are sent from country A to country B for certification on a regular basis. While sending the value of diamonds is included in exports and at the time getting back the diamonds after certification, the value is reported as imports. These high value transactions are notional only and unnecessarily inflate the exports as well as imports figures. Is this practice a proper one or not?*
- *In external trade, when the type of transport does not correspond to the territorial character of the sender's country (for example, goods import from Armenia in Georgia by sea transport, when Armenia does not have Sea) should be corrected? or there are other criteria here for determine mode of transport?*
